Open to: Bengaluru, Hyderabad, Pune | Open to relocate | Notice Period: Immediate

PROFESSIONAL SUMMARY

2025 Computer Science graduate and early-career Data Analyst skilled in SQL, Python, Power BI, and Excel. Hands-on through a Capgemini analyst graduate program, a DRDO data-analytics internship, and self-built projects on funnel, cohort, and retention analysis. Comfortable tracking KPIs, building dashboards, and delivering decision-ready insights in Agile teams.

TECHNICAL SKILLS

Languages	SQL (Joins, CTEs, Window Functions, Stored Procedures), Python (Pandas, NumPy, PySpark), C++
BI & Viz	Power BI, Tableau, MS Excel (PivotTables, XLOOKUP, Power Query), Dashboards, MIS Reporting
Data & ETL	Data Cleaning, Data Quality, ETL Pipeline Design, Data Warehousing, Data Modeling, Statistical Analysis, Hypothesis Testing
Analytics	Funnel Analysis, Cohort & Retention Analysis, KPI Tracking, User Segmentation, A/B Testing, Root-Cause Analysis
Tools & Process	MySQL, Git, JIRA, Jupyter, Agile / Scrum, Requirement Gathering

PROFESSIONAL EXPERIENCE

Analyst Trainee, Capgemini (Graduate Program) Sep 2025 – Jan 2026
Gurugram, India

- Cleaned and consolidated operational data from **5+ client** data sources into unified SQL and Excel reporting views, reducing manual report preparation time by **20%** through standardized reporting workflows.
- Built and maintained weekly KPI dashboards and status reports for senior analysts, validating 10K+ records per reporting cycle to identify discrepancies before stakeholder reviews.

Research Analyst Intern, LRDE (DRDO) Mar 2025 – Jun 2025
Bengaluru, India

- Built a radar-operations simulation in Python modeling **350+ real-time tasks**, generating structured performance datasets.
- Benchmarked 3 scheduling algorithms on task-completion rate, delay, and constraint violations, producing a data-backed comparison of trade-offs.
- Quantified the responsiveness-vs-utilization trade-off behind **91%+ task completion** in dynamic scenarios and documented the comparative findings for the team.

PROJECTS

B2C vs SaaS — Comparative Product Analytics Case Study (Self-Built) | [link](#) 2026
Tools: PostgreSQL, SQL (CTEs, Window Functions, Conditional Aggregation)

- Compared funnel, retention, and conversion frameworks across a B2C checkout funnel and a SaaS trial-to-paid funnel on two separate PostgreSQL datasets.
- B2C: Analyzed **25,000+ checkout interactions** across **17,000+ sessions** and **24.2M INR in GMV**, isolating an **8% payment-to-purchase drop-off** among high-intent users and tracking **9 weekly cohorts** for activation and retention.
- SaaS: Tracked **60+ monthly MRR snapshots** and **64 plan upgrades** over **5 years** of subscription history, quantifying a **29–43% dunning recovery rate**, recovering **9.7K INR**, and generating **8,160 INR in expansion MRR** from **35 seat-upgrade accounts**.

RapidKart — Quick-Commerce Analytics Case Study (Self-Built, Simulated Dataset) | [link](#) 2026
Tools: PySpark, SQL, Python, Power BI

- Designed a **1M+ row** synthetic dataset and built a data pipeline in PySpark and SQL to model a quick-commerce platform.
- Ran funnel analysis exposing a **42.8% drop-off** at Add-to-Cart → Checkout and a strong negative correlation ($r \approx -0.62$) between delivery time and conversion, linking operations to revenue.
- Segmented **10,000 users** into **3 behavioral cohorts** in Power BI, tracking **DAU (avg 529)**, **19.6% conversion rate**, and **90-day retention** to recommend growth levers.

EDUCATION

B.Tech, Computer Science & Engineering Nov 2021 – Jul 2025
Manipal University Jaipur, Jaipur, Rajasthan
CGPA: 9.27 / 10 | Dean's List for Excellence in Academics

CERTIFICATES & ACHIEVEMENTS

- IBM Data Analyst Professional Certificate
- Qualified GATE 2024 and GATE 2025 (Computer Science).
